1	the class was full of new information, and i learned a lot.
2	Very good overall. Would take again.
3	This class is exactly what i wanted when I signed up for it. I think Marquette is missing classes on wireless communications and Dr. Gao really satisfied that for me with this class. I only wish I could have taken more classes like this.
4	The material is interesting in general but is also very difficult in my opinion.
5	Good material

1	the professor was my favorite professor, he was happy to help whenever and really engaged with the class. great class and professor.
2	Professor Gao showed his interest in his teachings and that always bring attention to his class. The material always related to the real world, which is a plus for me.
3	Great Job Professor Gao! I think this class was a lot of fun and you were a good and fair teacher always being available for help outside the classroom is something every professor should have and you excelled at it.
4	Dr. Gao is an amazing professor. Since day one I have been impressed by his passion for the class, his kindness shown to his students, and his ability to recognize when students are struggling to understand content and rectify that. Furthermore, Dr. Gao is good at challenging us intellectually on the course content both in the homework and with his questions on his lecture slides. Lastly, it is uncommon to have a professor who is so obviously an expert in the topic they are teaching to the degree that Dr. Gao shows. He is able to answer any questions on the spot and go into as great of detail on anything regarding wireless communication as is needed. Lastly, I want to mention his sincere care for his students and how much that meant to all of us.
5	Dr. Gao did a great job with providing students with support. He was very understanding and always available for help. This was a very difficult semester and Dr. Gao truly made me feel like I was being supported. I would suggest going through examples during class just to help students understand how to apply what they are learning. I would rather thoroughly understand less material than vaguely understand more material. Also, maybe consider a better textbook and provide a schedule so that students can follow along with readings ahead of time.
